

NIH Planning and Evaluation Officers

The NIH Planning and Evaluation (P&E) Officers advise and support the National Institutes of Health (NIH) on science policy issues affecting the biomedical and behavioral research enterprise. To achieve this mission, P&E Officers collaborate with both the Office of the Director and scientific staff to develop and coordinate each Institute's planning, evaluation, and reporting process. The NIH P&E Officers serve as a key resource for the exchange and dissemination of information relevant to NIH policies, procedures, and strategic objectives.
